

LAND COMPANY GETS BUSY

Big Acreage Will Be Put Under Cultivation This Season Well Rig Operating

The Clark County Land Company, of which Mr. W. J. Latchford is president and W. N. Harris resident engineer, has already cleared and prepared 40 acres of land for cultivation. Three hundred acres will be added to the cultivated area just as fast as possible and the entire 340 acres put into grains and other dry farming crops this season.

In the mean time the big well rig just purchased is now in working order and is busily drilling for artesian water on section three. The big company is certainly making things hum at the new settlement of Winterwood and twelve months from this time will see wonderful changes on the 5000 acre ranch.
