

To Improve Road

Dr. G. W. Hillegass, president of the South Nevada Gold Mining Co., arrived from Oakland Tuesday and has since been busy at the mine. He reports that the mill is now operating on one unit steadily and that the three additional units will be placed in commission soon.

The company intends to proceed with grading and rolling Winterwood Boulevard at its own expense, the property owners not yet having shown sufficient interest to deed the right of way in entirety, or to contribute to the expense of putting the road in attractive condition as intended.
